

# The `customenvs-icons` package (0.1.5) – November 8, 2025

Cédric Pierquet

<https://github.com/cpierquet/latex-packages/tree/main/customenvs> (LATEX package)

`cpierquet – at – outlook . fr`

This package provides L<sup>A</sup>T<sub>E</sub>X support for various icons:

- <https://www.svgrepo.com/collection/education-vectors/>;
- <https://www.svgrepo.com/collection/design-8/>;
- <https://www.svgrepo.com/collection/math-symbols-4/>;
- <https://www.svgrepo.com/collection/games-7/>;
- <https://getbootstrap.com> ;
- <https://github.com/itstor/solar-icon-react> ;
- <https://mathix.org/linux/archives/21431>.

To use `customenvs-icons` in your document, include the package with `\usepackage{customenvs-icons}` or `\usepackage{customenvs}` for whole `customenvs` package.

An icon can be accessed using the icon name. A list of all included icons with their respective *page* can be found at the end of this document.

## Contents

<b>1</b>	<b>Example</b>	<b>2</b>
<b>2</b>	<b>Usage</b>	<b>2</b>
2.1	Generic macro . . . . .	2
2.2	Examples . . . . .	2
2.3	Used packages . . . . .	3
2.4	Bugs . . . . .	3
<b>3</b>	<b>List of icons</b>	<b>4</b>
3.1	Educ version (40 icons) . . . . .	4
3.2	Design version (60 icons) . . . . .	5
3.3	MathSymbol version (50 icons) . . . . .	6
3.4	Game version (50 icons) . . . . .	8
3.5	Bootstrap version (2078 icons) . . . . .	9
3.6	SolarBroken version (1183 icons) . . . . .	60
3.7	IA badges . . . . .	89
3.7.1	English version . . . . .	89
3.7.2	French version . . . . .	90

# 1 Example

```
...
\usepackage{customenvs-icons}
...
\begin{document}
...
Inline \ceicon{brush} version
...
\end{document}
```

Result: Inline  version

## 2 Usage

### 2.1 Generic macro

```
\ceicon%
  [educ=TF,design=TF,mathdesign=TF,height=..., (d)strut=...]%
  <includegraphics options>%
  {name}
```

The boolean [educ] (true by default) activate educ version of icon, and the boolean [design] (false by default) activate educ version of icon. And key [height=...] can be:

- **dauto** (by default): inline insertion with height/depth;
- **auto**: inline insertion with height/noddepth;
- **a length**: normal insertion with fixed height;
- **manuel height/depth**: normal insertion with fixed height/depth.

The keys [(d)strut=...] can be used to set the *reference* box for dimension calculations.

By default, some icons are given with a small border, so the given height is the height of the *full* box, not the hight of the icons.

Example: Inline  version or inline  version.

### 2.2 Examples

```
%normal version: inline with automatic height/depth (from qX characters)
\ceicon[height=dauto]{brush} %or \ceicon{brush}
```

qX

```
%normal version: inline with automatic height/depth (from specified characters)
(q\ceicon[height=dauto,dstrut=(qB)]{brush}B)
```

(qB)

```
%normal version: inline with automatic height (from X character) default version
\ceicon[height=auto]{brush}
```

XX

```
%normal version: inline with manual height/depth  
\ceicon[height={0.8em/-0.4em}]{brush}
```

qbXz

```
%fixed height  
\ceicon[height=2in]{brush}
```

### 2.3 Used packages

ifthen, calc, graphicx, xstring and simplekv are loaded and used by the package.

### 2.4 Bugs

For bug reports and feature requests, report on the GitHub repository <https://github.com/cpierquet/latex-packages/issues>.

### 3 List of icons

#### 3.1 Educ version (40 icons)

The PDF file is ce-educationvectors-all.pdf

### 3.7 IA badges

On Arnaud Durand's blog (<https://mathix.org/linux/archives/21431>), there are AI usage badges based on the developer's honesty.

The design was implemented in TikZ, and the pdf was generated.

#### 3.7.1 English version

```
